PROFESSIONAL SUMMARY

Senior Full-Stack .NET Developer with 5+ years of professional experience designing, developing, deploying, and maintaining enterprise web applications using Microsoft technologies. Proficient across the complete software development lifecycle: requirements analysis, software architecture, backend and frontend development, database design, API integration, authentication and authorization, testing, deployment, and production support. Proven ability to translate business requirements into scalable software solutions serving hundreds of users and generating thousands of operational reports, working independently as a primary technical contributor.

EDUCATION

Brigham Young University-Idaho <i>Bachelor of Science in Software Development. GPA: 3.91.</i>	Rexburg, Idaho, United States April 2026
Brigham Young University-Idaho <i>Associate of Applied Science in Applied Technology. GPA: 3.86.</i>	Rexburg, Idaho, United States July 2023
Universidad Nacional del Comahue <i>Associate Degree in Mining Engineering Technology.</i>	Argentina

EXPERIENCE

Full-Stack .NET Web Developer <i>General Division of Information and Technology</i>	June 2021 – Present Zapala, Neuquén Province, Argentina
- Designed and developed multiple enterprise web applications using ASP.NET Core, Clean Architecture, and multilayered architecture patterns. - Built full-stack solutions encompassing backend services, web interfaces, database layers, and API integrations. - Developed and maintained REST APIs with authentication and authorization mechanisms using ASP.NET Identity. - Translated business requirements and operational processes into production-ready software solutions. - Designed and optimized database structures and data access layers using Entity Framework Core and SQL Server. - Integrated external systems and services through API-based communication. - Developed responsive user interfaces and mobile-accessible solutions using Angular, Bootstrap, and JavaScript. - Led software architecture decisions and implemented maintainable application structures following SOLID and Clean Architecture principles. - Deployed applications to testing and production environments using Docker, IIS, and GitLab CI/CD. - Managed application maintenance, troubleshooting, debugging, and feature enhancements. - Delivered solutions used by hundreds of users, capable of generating thousands of operational reports.	

CERTIFICATIONS

- First Certificate in English (FCE) - Cambridge University Press & Assessment English, Level B2, Credential No. 0060045472
- Computer Programming Certificate - Brigham Young University-Idaho
- Full Stack Web Development Certificate - Brigham Young University-Idaho

SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, SQL, Python, Dart, HTML5, CSS3

Backend Technologies: ASP.NET Core (6/7/8/9/10), ASP.NET MVC, ASP.NET Web API, Razor Pages, Entity Framework Core, LINQ, RESTful APIs, OpenAPI / Swagger, NSwag, Authentication & Authorization, Identity API, .NET Framework 4.7.2

Frontend Technologies: Angular, Angular Material, Bootstrap, jQuery, AJAX

Databases: Microsoft SQL Server, Oracle DB, MongoDB, MySQL

DevOps & Tools: Git, GitHub, GitHub Actions, GitLab, GitLab CI/CD, Docker, IIS, AWS, Bash Scripting, Linux (Ubuntu, Fedora)

Software Engineering: Clean Architecture, N-Layer Architecture, SOLID Principles, Domain-Driven Design (DDD), Design Patterns, Data Structures, Code Review, Refactoring, DRY, KISS

AI Engineering: AI-assisted Software Development, LLM Integration, Prompt Engineering, Agentic Workflows, Model Context Protocol (MCP), AI Agents, AI-powered Code Generation, AI-powered Testing

Mobile Development: Flutter, Dart, .NET MAUI

Collaboration & Project Management: ClickUp, Asana, Slack, Discord, Zoom, Google Meet, Agile Development
